Notes on the differences between domestic and international accounting standards:

#### (1) Adjustment for production maintenance and safety production expenses

Pursuant to the relevant regulations of the related government authorities in the PRC, provision for production maintenance and safety production is accrued by coal mining companies based on coal production volume, which is recognised as expense in the income statement. On acquisition of production maintenance and safety facilities, fixed assets and accumulated depreciation for the same amounts are recognised upon purchase. Under IFRSs, these expenses are recognised in the income statement as and when incurred. Capital expenditure on production maintenance and safety facilities are recognised as property, plant and equipment, which are depreciated according to the relevant depreciation method.

### (2) Adjustment for transformation fund and environmental restoration fund Pursuant to the relevant regulations of the related government authorities in the PRC, provision for transformation fund and environmental restoration fund is accrued by coal mining companies in Shanxi Province based on coal production volume, which is recognised as expense in the income statement. Under IFRSs, expenses are recognised in

### (3) Revaluation of land use rights and others

the income statement as and when incurred.

Under China Accounting Standards for Business Enterprises, land use rights are carried at revalued amounts pursuant to the Restructuring. Under IFRSs, land use rights are carried at cost. Accordingly, the unamortised surplus on revaluation of the land use rights was reversed against the equity. After the date of revaluation, the amortisation of land use rights is different as a result of the differences in the carrying amounts.

#### (4) Tax effects and others

This adjustment mainly represents the deferred tax adjustments arise from the tax effects of differences in the accounting standards.

*Note: The above prices are quoted exclusive of value-added tax.* 

Benefited from robust demand of the coal market, the Group's weighted average price for coal sales was RMB370.2/tonne for the nine months ended 30 September 2008 (for the year ended 31 December 2007: RMB312.9/tonne), representing an increase of 18.3%. Among which, export sales weighted average price was RMB525.8/tonne (for the year ended 31 December 2007: RMB398.1/tonne), representing an increase of 32.1%. Domestic sales weighted average price was RMB354.8/tonne (for the year ended 31 December 2007: RMB301.8/tonne), representing an increase of 17.6%.

For the nine months ended 30 September 2008, the unit cost of production for self-produced coal operations of the coal segment under IFRSs was as follows:

	For the nine	For the year	
	months ended 30	ended 31	Change
	September 2008	December 2007	
	RMB/tonne	RMB/tonne	%
Unit production cost of self-produced coal	77.0	75.3	2.3
Materials, fuel and power	16.9	18.3	(7.7)
Personnel expenses	10.9	10.3	5.8
Repairs and maintenance	7.6	9.4	(19.1)
Depreciation and amortisation	17.0	16.9	0.6
Others	24.6	20.4	20.6

The unit production cost of self-produced coal of the coal segment of the Group under IFRSs was RMB77.0/tonne for the nine months ended 30 September 2008 (for the year ended 31 December 2007: RMB75.3/tonne), representing an increase of 2.3%. The main reason for the decrease in unit cost of materials, fuel and power was that upon the significant increase in the production of our Wanli Mines and Shengli Mines, due to their lower unit cost compared to other mines of the Group, the overall unit cost of materials, fuel and power dropped. The main reason for the decrease in repairs and maintenance was that some maintenance projects of coal segment had not completed by the end of reporting period in 2008. The increase in others expenses was mainly attributable to the increase in coal selection and minery fees and coal extraction service costs, and the increase of land use tax applied in Inner Mongolia and Shaanxi Province of China as well as other tax expenses.

It is estimated that the percentage increase of unit production cost of self-produced coal of the Group under IFRSs for the year 2008 as compared with that for the year 2007 will be higher than the percentage increase of that for the nine months ended 30 September 2008 as compared with that for the year 2007.

The uncertain factors relating to the Group's business environment for the fourth quarter of the year 2008 may have a effect on results of operations of the Group.
